

Interested in Exposure Science?

The International Society of Exposure Science (ISES) offers great opportunities for undergraduate and graduate students as well as career development and mentoring resources. Exposure science cuts across many disciplines, and any student with an interest in exposure science is invited to join ISES. The Society seeks broad participation from various disciplines including, but not limited to: exposure assessment, chemistry, biochemistry, risk assessment, biostatistics, physiology, toxicology, epidemiology, ecology, environmental engineering.

ISES has a great student and new researcher community. You can get in touch with us through the ISES [website](#), [LinkedIn](#), and [FaceBook](#).

ISES Student Membership Benefits

- **Reduced Membership Dues**
- **Reduced Fees for ISES Meetings and Events**
- **Student Awards and Fellowships**
- **Mentorship Programs**
- **Networking Opportunities**
- **Online subscription to the *Journal of Exposure Science and Environmental Epidemiology***

Student Opportunities at the Annual Meeting

The theme of the meeting is **Exposures in an Evolving Environment**. ISES encourages students to attend and may be able to provide travel awards. Students who attend will have opportunities to...

Hear about current science and present your own research!

Students are welcome at all regular scientific sessions during the week

- Participate in the annual student poster competition. Abstract submission is open now through March 27th.

Meet scientists from academia, government, and industry!

There are formal and informal opportunities to talk with exposure scientists about careers and scientific work.

- Special sessions for students and new researchers cover multiple topics

Participate in other educational –and entertaining– activities!

These include mixers as well as field trips and other special events.

- There is a “just” student/new researcher mixer to provide an opportunity for students, postdoctoral scholars and young researchers to meet in an informal atmosphere.

Participate in the first ever ISES video contest!!

Create a brief (max 1 minute!) video on:

- how your research is advancing the field
OR
- the importance of exposure science

Videos will be posted on the ISES YouTube channel and judged by a panel of exposure scientists.

The winning video receives a prize and will be shown at the 2015 Annual Meeting. Videos may also be shown on the ISES website.

Submit videos by March 31 via Google Drive to Judy LaKind

lakindassoc@gmail.com
